We are a multi-disciplined company providing a range of end-to-end solutions across Defence, Resources, Energy & Water industries. Century is a well-established, reliable asset partner, offering high quality engineering manufacturing solutions and services. An Australian owned business, Century is Adelaide based with service branches in Melbourne and Sydney.

Capability includes large CNC machining and specialized fabrication, in house painting and assembly capability, Century offer a low risk manufacturing solution to its customers. Their experienced trade's team complement quality & management departments when it comes to delivering complex multi-process engineering projects. Century has earned a proven reputation in delivering products and services for some of the largest land and naval projects in Australia.

- Complex fabrication
- High tolerance CNC machining
- In-house surface treatment
- Product assembly
- Through process NDT testing
- Through process material traceability
- In process quality documentation
- Customer materials management
- Production operations MRP system
- CAD design & drafting
- MDR report management

- 10,000sqm manufacturing facility
- 100% South Australian owned and operated
- 20 years manufacturing experience for Australia's Defence projects
- Commitment to investing in capital and manpower to develop and maintain a sustainable future
- Diverse across various market sectors – Defence, Mining, Power, Water, Rail, Oil and Gas
- Solid and diverse supply chain both domestically and internationally
- Asset Partner to our clients – providing solutions and through life support

- ARTC
- ASC
- AWD Alliance
- BAE Systems
- BHP Billiton
- Boart Longyear
- PMB Defence
- Metso Minerals
- SA Power Networks
- Xstrata

ISO 9001:2015 Quality
ISO 14001 Environment
ISO 3834 Welding
AS/NZS 4801 Safety
Achilles Oil & Gas Certification

Century Engineering has experience in supplying both Land and ship building programmes throughout Australia for over 25 years. Our management systems including quality and welding systems are mature. With our large machining and specialized fabrication capability complementing each other when it comes to delivering complex multi-process engineering projects. We have cemented a proven reputation in delivering products and services for Land and naval Defence programs within Australia.

PROJECTS LAND

Land Programs

M113AS4 APC upgrade - 125 vehicles consisting of:

- Hull stretch fabrication
- Hull & drive train machining
- Roof extension works including fabrication & machining
- Door & grill rebuild and manufacture (fabrication and machining)
- Various other fabrication & machining services throughout this project

Manufacture of 130 ULAC – 155mm M777A2 artillery munitions storage systems

Manufacture of Anti Rocket cage system for 60 ASLAV vehicles for deployment into Iraq

Manufacture of Landrover ROPS systems including turret rings for approx.100 vehicles

Machining of ASLAV turrets rings

Various through life repairs to ASLAV & M113 hulls – machining & fabrication services

Naval Programs

Hobart Class Air Warfare Destroyer programme

- Intakes, uptakes and exhaust piping & ducting
- Davit assemblies
- Helideck net assemblies
- Moisture separator panels
- Weapons foundation fabrication & machining
- Contract supply of piping and cable support systems
- Manufacture of Stowage's (L & K Copic's)
- Penetrations and hatches

PROJECTS NAVAL

Naval Programs (continued)

Collins Class Submarine Build & TLS

- MK32 Torpedo launch & loader system
- Battery pole post & busbar conductor system
- Diesel engine mounts
- Dive control consoles
- Power control consoles
- Propulsion motor service structure
- Pressure hatches and covers
- Ballast Valve fabrication & machining
- Generator bearing housings
- Stator machining
- Machining propeller shaft and nuts
- General fabrication, machining and painting for submarine build.

ANZAC Class Frigate build & TLS

- Piping systems
- Piping & electrical support components
