Products

Entech specialise in the design and manufacture of highly complex and rugged electronic products including:

- Industrial electronic product manufacturing
- Medical Electronics
- Precision Agricultural Electronics
- Banking and Data Security
- Australia LAND Platform VHUMS
- Foreign Defence Force Main Battle Tank Computing Systems and Smart displays

Key Customers –

- MIL-Spec Computing
- Med-tech
- Industrial automation
- Specialist power supplies
- High speed networking
- Defence
- Industrial surge protection
- Networked lighting controllers

Capabilities

Prototype PCB Assembly – Entech have a full complement of high end uBGA placement equipment, X-Ray and ERSA scope inspection stations. Entech delivers production quality prototypes.

Contract Electronics Manufacturing – Entech’s world class experienced engineers and management team, deliver competitive manufacturing practices and quality accredited contract manufacturing services.

Printed Circuit Board Supply - Entech Electronics specialises in quality customised PCB fabrication and supply, ranging from single sided PCB fabrication to 26+ layers.

Engineering Services - Entech’s team of engineers are able to work directly with design authorities, enabling and enhancing any team’s effectiveness when preparing products for market.

Harness and Cable Assembly

HMI Solutions - Entech Electronics specialises in the design and manufacture of advanced technology switching systems. Their custom designed keypads can be supplied with a full range of design options

Accreditation

- ISO Accreditation:
 - ISO 9001:2008 continuous improvement system
 - ISO 13485 medical device manufacturing
 - AS9100 (scheduled Q4 2018)
- Underwriters Laboratory
- IPC certified staff – capable of delivering IPC-A-610 Class 3

Discriminators

Entech’s unique business model is a key enabler to many of our clients, who ask their manufacturer to help them navigate product development, device certification, supply chain security and through life support.

Entech can provide quality certified small volume, high mix manufacturing performed in Australia, or low cost, medium and high volume in our 100% Australian owned and operated facility in China.

Entech’s dedicated prototype manufacturing cell, coupled with our experienced team of engineers and project managers, can enrich and accelerate your product development program, meaning faster time to market, reduced costs and increased productivity.
