Products

IPACS Australia are leaders in the collection, monitoring and reporting of real-time asset performance in industries including mining and resources, defence, energy and manufacturing. We design, develop and sell asset management hardware technology and software. Our best known platforms are the IPACS Asset Optimisation Technology and the IPACS Remote Asset Management Centre.

Our suite of technologies – which include IT infrastructure management, asset data management, analytics and dashboards – provide real-time feedback on the performance of critical assets, wherever they are located.

We analyse data and provide reports in clear, easily understood formats, enabling organisations to make informed and timely decisions.

Discriminators

Our advanced technology platform incorporates:

- remote monitoring via specialist sensors and data collectors at the platform
- secure data transmission to an onshore facility from anywhere in the world
- data analytics and automatic alerts built on a secure, robust, 24 hour operation software platform with easy-to-use dashboards – all in real-time

IPACS can assist the ADF increase their production and reduce their operating costs.

Capabilities

IPACS applies proven techniques and technologies in new ways to provide low risk, high value solutions. Their core capabilities are:

Smart Infrastructure – Infrastructure optimised for the secure, reliable and low-cost collection and transmission of remote sensor data, across the enterprise and from anywhere in the world.

Management of Asset Data – Software for the management of enterprise-wide time series data in the context of an asset framework.

Analytics for Asset Performance – Algorithms for the analysis and diagnosis of asset condition and performance.

Asset Performance Dashboard – Software for the presentation of real-time asset performance to decision-makers

Key Customers

- Defence: Tenix/ BAE Systems, Babcock International, DSTG
- Mining: BHP, Oz Minerals, FMG
- Oil & Gas: Santos, Epic Energy, Total
- Utilities: SA Water, Alinta Energy

Memberships

IPACS staff hold the following memberships:

- Society of Naval Architects and Marine Engineers
- The Institute of Marine Engineering, Science and Technology
- Society of Petroleum Engineers
- IEEE Technical Committee on Computer Architecture

Accreditation

System Accreditations

IPACS' systems have received the following accreditations:

- Det Norske Veritas (Certification Number: DSO-242-JEWA/Bvoe)
- Lloyd's Register (Certification Number: 05/00086)
- ABS Europe Limited (Reference Number: PID 450057)
