

Mincham Aviation Pty Ltd

COMPANY / CAPABILITY OVERVIEW

Established in 1996, Mincham Aviation and has grown to become recognised as one of Australia's leading partners of choice for Aerospace & Military lightweight structures.

Our primary focus is on the research & development, design, prototyping and low volume production of materials, manufacturing processes and lightweight high strength structures for the Aerospace, Maritime and Special Vehicles industry sectors. Our broad skillsets and experience are coupled with the relevant capabilities, including CNC equipment & medium and large aerospace composite autoclaves that validates our claims to being one of Australia's true complete lightweight structures houses.

CAPABILITY

Fabrication technologies including but not limited to: Composites, Sheet Metal, Welding, CNC Machining, Heat Treatment, Painting, Project Management, Engineering Consulting and Design, 3-D CAD modelling, UAV Platforms and Delivery Systems, Aeromedical Devices.

Contact: Darryl Mincham

Address - Hangar 51 Anderson Drive, Parafield Airport,
South Australia 5106.

COMPETITIVE DISCRIMINATORS

- Experienced in Major Aerospace Programs,
- Pro-active Laterally Integrated Network
- Proven Export Experience
- ITAR Compliance Ready
- Highly Qualified Engineers and Trades People
- Lean workshop practices
- Majority Aerospace and Defence Focused
- Secure Facility
- Reduced development and production time frames
- Prototype to Production

CERTIFICATIONS / ACCREDITATIONS

AS9100, ISO9000, Boeing, Northrop Grumman approved supplier. commitment to LEAN principles, SCIP

PARTNERS & CUSTOMERS

KEY PARTNERS

Australian Aerospace Alliance, MALIN Members (Mincham Aviation Laterally Integrated Network) & Australian Innovation Technology Alliance.

KEY CUSTOMERS

Mincham Aviation are key and strategic suppliers to some of Australia's, and the worlds most trusted and respected Defence and Aerospace companies such as, Boeing, BAE Systems, Airbus, Hawker Pacific, Royal Flying Doctor Service, Defence Science & Technology Group (DSTG), Northrop Grumman, Royal Australian Airforce (RAAF), Capability Acquisition and Sustainment Group (CASG), Nova Systems, Cobham Aviation Services, Flight Training Australia, CEA Technologies, Raytheon Australia , Babcock International
