▶ CAPABILITIES

- Provision of a full-range of instrumentation calibration, servicing and repair services for **Temperature & Humidity / Pressure / Force & Torque / Flow / Electrical / Weight & Height / Light & Sound**
- SUDEL routinely provides plant maintenance management contract services across a range of industries, from preventative maintenance services through to breakdown services and planned plant maintenance shutdowns.
- Overhaul & Certification of Pressure Relief Valves to Australian Standards
- Our Project Management team can successfully implement and execute greenfield and brownfield construction projects across a multitude of industries

▶ KEY CUSTOMERS

- Schneider Electric – Australia Wide
- BOC Gases Pty Ltd / Air Liquide Australia
- Alliance Airlines / TAE Aviation Pty Ltd
- Babcock Integrated Technology Australia
- Origin Energy / EnergyAustralia
- BHP Billiton / Bureau Veritas Minerals
- Boral / Downer EDI / Boart Longyear
- Coates Hire Operations Pty Ltd
- Halliburton Australia / New Castalloy Pty Ltd
- Lion Nathan / Coopers Brewery
- SA Water / Trillity / Allwater

▶ KEY MARKETS (Local / International & Potential)

- ▶ Defence
- ▶ Energy & Resources - Mining
- ▶ Water & Wastewater
- ▶ Food & Beverage
- ▶ Industrial Manufacturing
- ▶ Health & Medical

▶ QUALITY APPROVALS & AWARDS

- ISO:9001. 2008
- Electrical / Plumbing & Gas Fitters / Refrigeration License
- Hazardous Area Instrument & Electrical Installation Services
- Achilles Oil & Gas Accreditation
- AI Group Membership
- ICN Membership
- Food SA Member
- DIAA Member
- DTC Member

SUDEL - A multi-disciplinary service & project execution company for instrumentation calibration, controls, and electrical installation and maintenance services.

From routine calibration services through to project-based electrical and control systems installation and commissioning, service and maintenance, our philosophy is to ensure that the job gets done, and gets done right.

▶ DISCRIMINATORS

- Highly trained Trade Certified service technicians available, 24/7, to assist and identify plant equipment and instrumentation faults; and offer on-site repair and/or calibration services. Our [ProCalV5](#) on-line web-based system provides clients with a traceable record of test instrumentation calibration. The system provides an effective tool for asset management, enabling performance traceability over time, and meeting quality compliance requirements, ISO:9001 specifications, 21 CFR 11 military specifications, Government Compliance.
- Infrastructure & Capability to offer National Fleet Equipment Services
- Alert reminders of scheduling requirements for test instrumentation assets are provided in line with routine calibration services.
