Products

Our team of Key Account Managers are trade qualified and have extensive experience across many facets of the engineering sector:

- engineering
- machining
- mining
- rail
- sheet and coil
- ground support equipment
- defence; and
- project management

Having exposure to many different companies all over Australia, and complementing their experience with knowledge gained overseas, they are specialists in their fields.

Capabilities

Verseng Group broad range of equipment and expertise allows them to service a range of customers with diverse requirements, ranging from small machined components to large machined parts and fabricated assemblies.

Verseng Group offers onsite service and maintenance of customer equipment and through life support of their ground support equipment range.

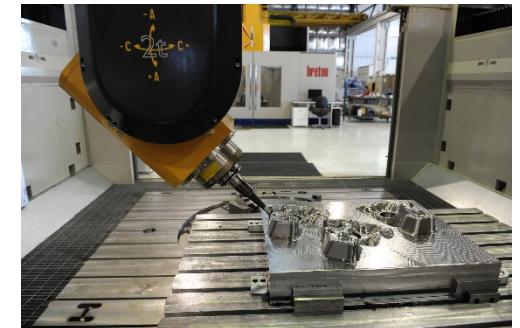

Verseng Group offers a 'design to delivery' service to the commercial, defence, mining and industrial markets. Their versatile design skills utilising CAD/CAM systems enable them to develop solutions for challenging products.

- Conceptual design, development and documentation
- Design optimisation
- Re-design and reverse engineering
- Research and development
- Engineering analysis
- Manufacture of prototypes, samples and test devices

Other capabilities include fabrication and precision manufacturing.

Key Customers

- Defence Industry
- Mining and Industrial
- Marine
- Rail Industry
- Sheet and Coil
- Ground Support Equipment

Discriminators

- Design to Delivery
- Large capacity 6 axis CNC machining
